```c
#include<stdio.h>

int main() {
    int start, i,end, sum=0;

    printf("Enter the start value:");
    scanf("%d",&start);

    printf("Enter the ending value:");
    scanf("%d",&end);

    for(i=start; i<=end; i++)

    if(i%2!=0)
    {
        sum=sum+i;
    }
        printf("\nSum of all the odd numbers between %d and %d is :%d",start, end, sum);

    return 0;
}
```
